- 1. Preliminary 3
- 2. The AHP Charter 3

1. Preliminary

The African Hydrogen Partnership (AHP) Charter expresses the most fundamental guiding principles of the AHP. The purpose of the AHP Charter aims at aligning the expectations of all AHP Members and all organizations and stakeholders interested in or cooperating with the AHP.

2. The AHP Charter

By joining the AHP, the Members:

- Support and strive to achieve the climate targets of the Paris Agreement as well as the UN Sustainable Development Goals.
- Promote natural (native) and green hydrogen as a clean, renewable and sustainable energy carrier and feedstock to achieve the transition to net zero emission societies.
- Recognize that hydrogen can be produced in many ways and that there are different carbon free/neutral hydrogen production pathways in order to enable a zero-emission society.
- Cooperate in the transition of energy generation, transportation, consumption and sector coupling to hydrogen, fuel cell and related technologies as well as the promotion of a strong African hydrogen industry incorporating these systems and technologies.
- Promote fair business practice and provide the necessary support to facilitate the establishment of African hydrogen value chains.

The AHP is the continent-wide African association representing the interest of the fuel cell and hydrogen industry and its stakeholders.
