1. Location

The African Hydrogen Partnership Trade Association (hereinafter referred to as the “AHP”) is incorporated in Mauritius.

2. Objectives

The main objective of the AHP is to promote, support and accelerate the deployment of green and natural (native) hydrogen and fuel cells technology as well as to improve access to (clean) energy and mobility in Africa by aligning the industry, renewable industry and financial industry community and herewith increasing the effectiveness of the representation of this community.

The Association will enable member companies to exchange views and ideas on economic, technical and other relevant social topics, including the treatment of political, general legal and tax issues on a pan-African basis. It will enable them to communicate with the public, governments and administrative bodies with one voice.

Within this context, the AHP is to position itself as the main association in Africa and at the African Union level, directly representing key industry leaders, SMEs, national and regional associations in the field of hydrogen and fuel cells technology and providing them with an expert platform.

The AHP’s objectives further include development and strengthening of advocacy and visibility by disseminating information and educating policy-makers, thereby generating their support and positioning itself (the AHP) as the key catalyst and coordinator for achieving synergies with other policies, schemes and activities in or for Africa.
